S Pranava

Full-Stack Systems Engineer | Cloud & Applied AI

Mangaluru, Karnataka, India

+91-8310253429 · psholla04@gmail.com · pranava-dev.vercel.app · linkedin.com/in/pranava-s · github.com/pranav-sh4

Education

Sahyadri College of Engineering and Management **Mangaluru, India**

*Bachelor of Engineering in Computer Science and Engineering — **CGPA: 9.4*** *2022 – 2026*

Professional Experience

Sclera **Mangaluru, Karnataka**

Software Product Developer (6 Mos Internship — 3 Mos Full-Time) *Feb - Oct 2026*

- Spearheaded web platform migration to **Next.js 16 App Router** with headless **Strapi CMS**, applying **Incremental Static Regeneration (ISR)** and dynamic metadata architectures that improved SEO indexing and cut FCP by **45%**.
- Architected **Sclera 2.0** micro-frontend framework utilizing **Turborepo** and **Webpack Module Federation**, decoupling monolithic codebases into isolated, independently deployable feature apps and accelerating delivery cycles.
- Engineered the **Niurix** e-commerce storefront, delivering complete multi-currency checkout flows, granular RBAC routing, server-side caching pipelines, and automated bot prevention via reCAPTCHA v3.

Technical Projects

IntelliHire: NLP Resume Parser & Job Matching Engine | *React.js, Node.js, Express.js, Python, MySQL* **Nov 2025**

- Built an automated candidate evaluation engine featuring blind parsing layers to mitigate demographic hiring bias, paired with predictive career path simulations based on historical trajectory benchmarks.
- Implemented an ensemble NLP pipeline uniting custom **spaCy NER** for multi-attribute skill extraction with **TF-IDF cosine similarity** for semantic job-candidate matching with sub-second (<800ms) latency.
- Engineered recruiter portals with normalized SQL schemas, automated CV text extraction, and secure stateless JWT verification.

WenSync: Distributed Clinical Automation Platform | *Next.js, Express.js, MongoDB, Firebase, Python* **Jun 2025**

- Designed a fault-tolerant hospital operations engine streamlining patient registration, real-time consultation ticketing, and emergency surgical theater scheduling to resolve clinical throughput bottlenecks.
- Formulated an ML-driven patient queue prioritization model and automated inventory tracking pipeline that reduced outpatient wait times by **35%** during live emergency simulation scenarios.
- Integrated WebSocket state synchronization, Firebase event-driven alerts, and multi-tier RBAC for clinical data interchange.

SwapSkill: Peer-to-Peer Collaborative Knowledge Exchange | *React.js, Node.js, Express, MongoDB, TailwindCSS* **Jan 2025**

- Created a distributed platform connecting students and mentors through bilateral skill-trading contracts, featuring real-time collaborative milestone tracking and an integrated sponsorship discovery module.
- Constructed secure REST APIs with Bcrypt password hashing, rate limiting, and stateless JWT authorization, backed by indexed MongoDB collections sustaining fast data retrieval under concurrent user traffic.

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, C, C++, SQL
Frontend & UI: React.js, Next.js, React Native, Figma, Redux Toolkit, Tailwind CSS
Backend & Systems: Node.js, Express.js, RESTful APIs, Micro-Frontends, RBAC
Databases & Cloud: PostgreSQL, MySQL, MongoDB, AWS, Docker, Git

Publications & Achievements

IEEE ETCOM 2025 Conference Publication | *IEEE Xplore Digital Library* **Nov 2025**

- Authored *"AI-Driven Resume Analysis: Ensemble-Based Skill Extraction and Semantic Job-Candidate Matching"* (Paper ID: 2123); presented peer-reviewed findings at SDM Institute of Technology, indexed in IEEE Xplore.

Book Chapter Publication | *IGI Global Scientific Publishing* **Oct 2026**

- Co-authored *"Quantum Approximate Optimization Algorithm (QAOA) for Resource Allocation in Hybrid Cloud Environments: A Pathway to Green FinOps and Scalability"* in **Quantum Information Theory, Entropy, and Computational Complexity**.

Finalist – SkillSangam 2k25 TCE Hackathon **Jun 2025**

- Engineered **WenSync**, an automated clinical triage and scheduling platform featuring real-time token queues, OT orchestration, and ML inventory analytics.

Certifications

React Programming Professional Training | *Incture Technologies* **Jul 2025**
AWS Cloud Practitioner Essentials | *Amazon Web Services* **Aug 2025**
Programming in Modern C++ | *NPTEL & IIT Kharagpur* **Apr 2024**
